Secure Video Processor Licensing Authority (SVPLA) Selects TC TrustCenter to Deliver and Manage RootHosting Services

**~ Efforts for SVP to become the international standard in content protection will
be supported through TC TrustCenter's RootHosting Services ~**

Hamburg / Germany, February 12, 2007 – TC TrustCenter, a leading specialist in identity verification and security services, today announced that the SVPLA has selected TC TrustCenter's RootHosting Services to be one of the Root Key Hosts to support their content protection and digital rights management initiatives.

Founded in 2005, SVPLA LLC is a wholly owned subsidiary of NDS Ltd., the leading provider of technology solutions for digital pay-TV, and is responsible for licensing the rights to manufacture SVP-compliant chips and devices in a fair, reasonable, and non-discriminatory manner. SVP consists of an open set of technical specifications, compliance and robustness rules for end-to-end content protection. SVPLA works closely with the SVP Alliance, an industry association consisting of over 35 members, to promote the broad market adoption of SVP and to develop interoperability with other DRM and content protection solutions. To support SVPLA's initiative to promote the broad marketing adoption of SVP's technology, the organization selected TC TrustCenter's RootHosting Services.

TC TrustCenter's RootHosting Service allows companies' Root Keys to be stored and securely operated in an accredited, secure facility. For those wishing to run their own public key infrastructure while having their root keys secured at the highest level, TC TrustCenter offers a fully-managed RootHosting service, which allows companies to focus on their core business. By leveraging TC TrustCenter's leading technology,

expertise and established certificate practice statement, companies not only reduce costs, implement more quickly and enforce security, but they also win the trust of customers, partners and suppliers in their electronic communication.

“We needed a partner that could be flexible by offering us customized solutions, and we are pleased to be working together with TC TrustCenter to securely manage one of the root keys being deployed for the SVPLA”, said Jas Saini, Director, SVPLA.

“We found that most service providers only offered standard solutions, but with TC TrustCenter we found what we were looking for – a managed turnkey solution. We felt TC TrustCenter was a great fit based on their reliability and flexibility. In TC TrustCenter, we found a true partner we could trust, and also who could provide us with a solution meeting our requirements for security and compatibility.”

“We are very pleased to work with SVP and to provide the infrastructure they need to run their content protection technology,” said Dr. Rolf Lindemann, Director of Product Management, TC TrustCenter. “This is a great example of how TC TrustCenter’s experience and flexibility can allow our customers to select the solution that works best for them.”

About The SVPLA

SVPLA LLC is a wholly owned subsidiary of NDS and is responsible for licensing the rights to manufacture SVP-compliant chips and devices in a fair, reasonable, and non-discriminatory manner.
